Traditional mathematics (sometimes classical math education) was the predominant method of mathematics education in the United States in the early-to-mid 20th century. This contrasts with non-traditional approaches to math education. Traditional mathematics education has been challenged by several reform movements over the last several decades, notably new math, a now largely abandoned and ...

In science education, a word problem is a mathematical exercise where significant background information on the problem is presented as text rather than in mathematical notation. As word problems often involve a narrative of some sort, they are occasionally also referred to as story problems and may vary in the amount of language used.

Word problem (mathematics education) - Wikipedia

Students explore the chemical identities of polymeric materials frequently used in their everyday lives. They learn how chemical composition affects the physical properties of the materials that they encounter and use frequently, as well as how cross-linking affects the properties of polymeric materials.

Everyday Polymers - Lesson - TeachEngineering

Course details. This degree has three stages, each comprising 120 credits. You'll normally start Stage 1 with a 30-credit introductory module followed by three further 30-credit modules in pure and applied mathematics and statistics.; Next, in Stage 2, you'll study two 30-credit statistics modules, followed by a 60-credit module in either applied mathematics or pure mathematics.
