NCE estimates that roughly US\$2–3 trillion per year will be required between 2015 and 2030 to fill the sustainable infrastructure financing gap. 27 Infrastructure related to sustainable urban development is estimated to account for between two-thirds and three-quarters of all infrastructure investment to 2030. 28 There is also scope to lower the total investment needs though safeguarding and ...

Cities — NCE 2018 - newclimateeconomy.report

A watershed is an area of land that drains water to a single water body. Watersheds are as small as a few acres draining into a stream or as large as several states draining into the ocean.
