S<sub>N</sub> / E Competition - Introduction. In describing the mechanisms of nucleophilic substitutions and  $\beta$  eliminations, great importance is usually attached to the differentiation between the unimolecular and bimolecular mechanism of the rate-determining step. This pertains to the differentiation between the S<sub>N</sub>1 and S<sub>N</sub>2 mechanism on the one hand, and the E1 and E2 mechanism on the other hand.

Heavy metals are generally defined as metals with relatively high densities, atomic weights, or atomic numbers. The criteria used, and whether metalloids are included, vary depending on the author and context. In metallurgy, for example, a heavy metal may be defined on the basis of density, whereas in physics the distinguishing criterion might be atomic number, while a chemist would likely be ...
